

# **Alternate Realities**

## **Project 1 Proposal**

Amina Kobenova

# World Description

For this project, I got inspired by the TV Series called *Snowpiercer*.

**"*Snowpiercer* is an American post-apocalyptic dystopian thriller television drama series that premiered on TNT on May 17, 2020. It is based on both the 2013 film of the same name, directed by Bong Joon-ho and the 1982 French graphic novel *Le Transperceneige* by Jacques Lob, Benjamin Legrand and Jean-Marc Rochette, from which the film was adapted." (Wikipedia)**

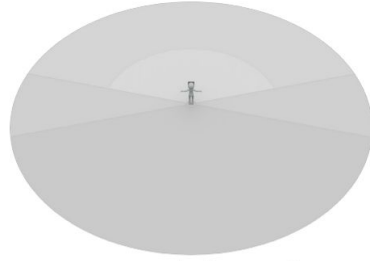

After watching this show, I started to have a series of nightmare-dreams about living in the *Snowpiercer* reality. Combining the TV-show's aesthetics as well as some elements from my imagination, I want to create an environment of a post-apocalyptic train station.

# Space Description

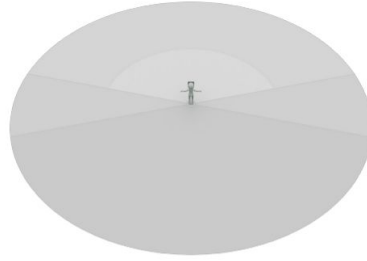

The theme of the environment is post-apocalyptic, modern, and dark overall. There might be a few sounds used for a better immersion. I am planning to download free Unity assets from the Asset Store and see how they fit the environment.

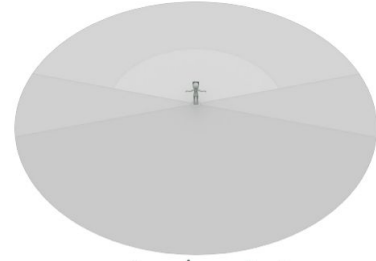

# Storyboard

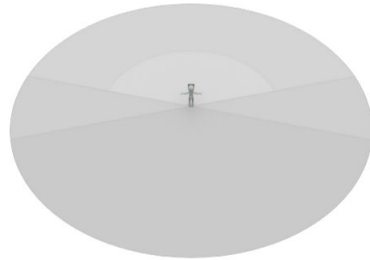

Appearing before the  
scenery : snowy  
environment with  
a train station vibe

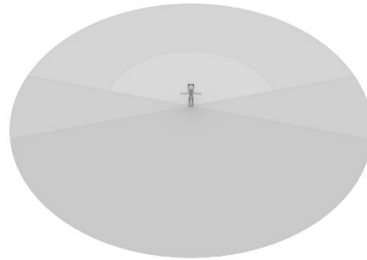

There is one train  
that stands out,  
and it makes  
sounds

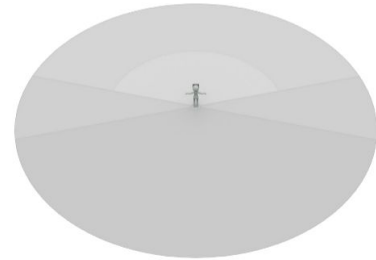

If explored further,  
one can find a  
lot of post-apocalyptic  
scenery elements

Winter elements are  
clear : snow sound  
and the environment

Perhaps the train  
will leave  
after being in  
the scene for a while

Train leaving —  
the end.
